An **em** unit is a relative unit of measurement based on the parent element.

1em = fontsize
2em = 2 x fontzize

1em is equal to the font-size of the element in question.

So when using it with margins, it will be equivalent to the font-size of the element you're applying the margin too.

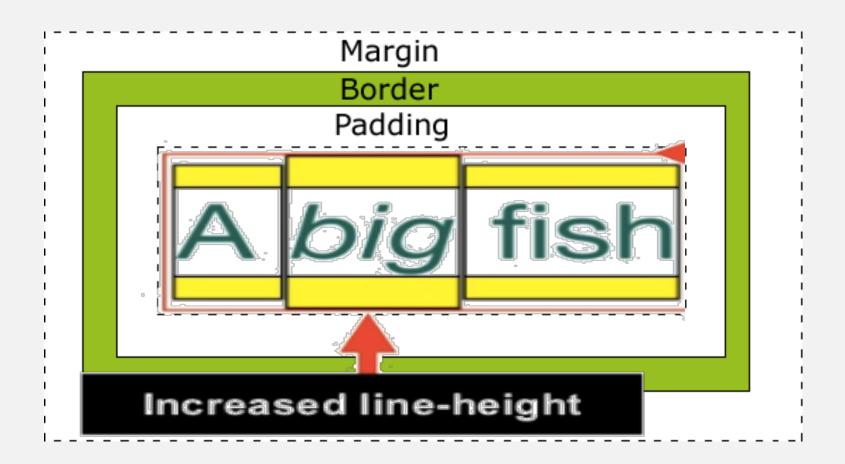

```
.exampleDiv{
   font-size: 16px;
   margin-top: 0.5em /* 8px */
   margin-bottom: 0.5em /* 8px */
}
```

```
body {
   font: 100%/1.5 serif; /* 16px, browser default */
h1{
   font-size: 2em; /* 32px */
@media (min-width: 600px) {
    body {
       font: 112.5%; /* 18px */
   h1 {
       /* Do nothing! I'll automatically be 36px */
```

#### Antwoord van de directeur-generaal op mediaberichten

08 mei 2016

Loals velen van jullie was ik op woensdagmorgen onaangenaam verrast door de koptitel en de teneur van de eerste drie pagina's in De Morgen. Vanuit het verengende oogpunt van de islam werd er ons project van de katholieke dialoogschool voorgesteld, en werden concrete casussen, gesprokkeld uit een tweetal telefoongesprekken met de betrokken journalist, over religieuze kentekens, stille ruimtes en koranlessen opgevoerd als hét nieuwe beleid van Katholiek Onderwijs Vlaanderen. Wie het artikel wel volledig gelezen heeft, zal uiteraard gemerkt hebben welke tekstfragmenten werkelijk van mij kwamen en wat door de redactie van De Morgen werd aangevuld. Zeer contextbetrokken voorbeelden werden uitvergroot, en samen met de exclusieve focus op de islam, op Vlaanderen losgelaten. Uiteraard betreur ik dit ten zeerste.

Aanleiding voor beide telefoongesprekken met de journalist (één ervan twee weken geleden en één vorige dinsdag), was zijn
